

ROUND BOLLARDS Stainless Steel

316
Marine grade
polished
stainless
steel

Our round stainless steel bollards are offered in three designs: below ground for installation into a concrete footing, core drilled for installation into a core drilled hole using epoxy adhesive, or surface mount for bolted installations.

Manufactured from marine grade 316 stainless steel these bollards are all finished with No. 4 mechanical finish. 316 grade is recommended for installation near coastal areas to minimise the risk of tea staining and to ensure the bollards maintain a high quality appearance over many years. Our stainless steel bollards have a machined flat cap. This helps present a high quality appearance required for architectural environments.

For the ultimate high quality presentation, polished stainless steel skirts are available as an option to cover the base plates and fixings.

Features:

- 316 grade polished stainless steel.
- Machined flat cap.
- Available in surface mount, new concrete or core drilled models.
- 90 or 140mm diameter.
- Optional cover skirts available.
